A LIST OF HARDY FIELD-GROWN PERENNIAL FLOWER PLANTS FOR FALL SETTING

We can supply hardy, field-grown, 1 and 2-year-old clumps of perennials from our nurseries, at the following low prices. These clumps are healthy and well developed, and will give immediate results the coming season. Will supply these plants for the next 3 months, which will be the proper time for setting them. They should be set deep and firmly in the ground, and if dry, should be well soaked down. Will close out our retail business Jan. 1st, 1935, turning our attention to the wholesale business. We will supply no more seedlings, or divisions by the dozen, as heretofore. Many of these clumps may be divided, if desired, making five to ten divisions each. But if you want immediate results and a full display of blossoms, it would be better not to divide them.

Please order by giving name of plant, number and variety. Our prices range from 3 to 15 cents each, F. O. B. here. Many nurserymen are listing this quality of plants at two or three times as much. Orders not accepted for less than 75c.

PERENNIAL FLOWER PLANTS AND BERRY PLANTS

ACHILLEA—10c Each
